

Tector Ceram - Grout Ultra

Description

White/Grey

Use

Used for filling and sealing Tile joints

Benefits

Easy to Apply, Affordable and high bondability

Technical Specs: US ISO;13007

CG1

Surface Preparation

Use Tector Ceram Grout Ultra after 24 hrs of Tile Adhesive application and ensure Tile joints are free from loose material or dust

Mixing

Add TectorCeram Grout to clean water and stir until a stiff creamy consistency is achieved. Mixing 1 L per 3 kg of grout

Mix small amounts of Grout at a time to avoid excess mixture stiffening before use

Port Life of mixed grout is approximately 1 Hour

Lightly dampen Tiles and Joints with clean water before application of grout to prevent excess water loss from grout

Coverage

Coverage varies depending on the size of the joint width and depth

1 Kg covers 4metres

Storage

24 month shelf life in sealed packaging in a dry area.
